

Insourced Services to Support the Provision of Healthcare Services

With the backlog of patients waiting to start treatment on the NHS growing by the day, trusts are looking for a solution to enable patients to be seen within the trust and bring down waiting times. Our Insourced Service agreement offers a short to medium term solution to secure extra clinical capacity. The framework includes the provision of clinical services to support you with meeting waiting time targets and easing pressure by utilising the services of providers on NHS premises, allowing you to retain capacity planning.

What is included in the framework agreement?

Insourcing describes a range of medical and clinical services which trusts can deploy to utilise spare, out-of-hours capacity to support your existing provisions to help you bolster services, tackle waiting lists and improve efficiency. Our agreement offers the option for direct award and further competition across a broad range of services including adult and paediatric including:

- Cardiology diagnostics
- Dermatology
- Diagnostic imaging
- Endoscopy
- Ear, Nose and Throat (ENT)
- General surgery
- Specialist surgery
- Gynaecology
- Ophthalmology
- Orthopaedics
- Physiotherapy
- Urology

How can the agreement help me?

- A cost effective, flexible solution, with a commercial model providing discount from national tariff
- Provide you with support in achieving your waiting list targets
- Assist you in achieving better Key Performance Indicators (KPIs)
- Ensures consistent standards with regard to the delivery of these services and compliance with NHS requirements
- Ability to contract with providers to the market on bespoke terms and conditions which incorporate flow through as applicable from the NHS Standard Contract
- Call off terms and conditions enhanced to incorporate the specific requirements when procuring a clinical service.

Where can I find out more?

Further information including lots and suppliers is available on the NHS Workforce Alliance website, alternatively you can contact your Customer Relationship Manager.
